

# Computer Programming

## Lab4

Apr. 4, 2025

# Ex3

- Write a program to find the maximum value from 10 input integers. Use a for loop and do not use an array.

- Program output

```
[ohyong@cse Lab4]$ vi ex4_3.c
[ohyong@cse Lab4]$ gcc ex4_3.c -o ex4_3
[ohyong@cse Lab4]$ ./ex4_3
Enter 10 integers:
Enter number 1: 20
Enter number 2: 34
Enter number 3: 56
Enter number 4: 15
Enter number 5: 35
Enter number 6: 88
Enter number 7: 90
Enter number 8: 57
Enter number 9: 45
Enter number 10: 95
The maximum value is: 95
```

```
[ohyong@cse Lab4]$ ./ex4_3
Enter 10 integers:
Enter number 1: 45
Enter number 2: 23
Enter number 3: 89
Enter number 4: 56
Enter number 5: 55
Enter number 6: 67
Enter number 7: 17
Enter number 8: 26
Enter number 9: 67
Enter number 10: 46
The maximum value is: 89
```

# Ex extra1

- Write a program to read in a integer number, and check that the number is within the range of 0 to 9. If the number is not within the range of 0 to 9 (inclusive), ask the user to enter the number again and repeat this until the number is within the range of 0 to 9. When the number is within the range of 0 to 9, print out the number.
  - Use *do-while* loop.

# Ex extra1

- Program output

```
[ohyong@cse Lab4]$ vi ex4_extra1.c
[ohyong@cse Lab4]$ gcc ex4_extra1.c -o ex4_extra1
[ohyong@cse Lab4]$ ./ex4_extra1
Enter a number between 0 and 9: 13
Your number is not in the range 0 to 9! Try again.
Enter a number between 0 and 9: -5
Your number is not in the range 0 to 9! Try again.
Enter a number between 0 and 9: 7
You entered: 7

[ohyong@cse Lab4]$ ./ex4_extra1
Enter a number between 0 and 9: 6
You entered: 6

[ohyong@cse Lab4]$ ./ex4_extra1
Enter a number between 0 and 9: 9
You entered: 9
```

# Ex extra2

- Write a program that inputs the upper case to be printed on the last line and prints it as output.

# Ex extra2

- **Program output**

```
[ohyong@cse Lab4]$ vi ex4_extra2.c
[ohyong@cse Lab4]$ gcc ex4_extra2.c -o ex4_extra2
[ohyong@cse Lab4]$ ./ex4_extra2
Enter an upper case character you want to print in the last row: K
A
B B
C C C
D D D D
E E E E E
F F F F F F
G G G G G G G
H H H H H H H H
I I I I I I I I I
J J J J J J J J J J
K K K K K K K K K K K

[ohyong@cse Lab4]$ ./ex4_extra2
Enter an upper case character you want to print in the last row: G
A
B B
C C C
D D D D
E E E E E
F F F F F F
G G G G G G G
```

# Submission

- **Submit to server**

At the end of the Lab4, submit your C sources file by typing

`~gs1401/bin/submit Lab4_5 ex4_3.c ex4_extra1.c ex4_extra2.c // by Fri. 13:50`

You may check that you have submitted your source code correctly by typing

`~gs1401/bin/submit -check`
